

TREE SEEDLING PLANTING INSTRUCTIONS

1
Insert spade at 45° angle and push forward to upright position.

2
Remove spade and place bare seedling at correct depth.

3
Hold seedling at correct depth, insert spade 3" from seedling.

4
Pull spade toward seedling to close hole at bottom of roots.

5
Push spade handle forward to close hole at top of roots.

6
Press with heel to ensure good soil contact with roots.

Do not overwater your seedling. Keep roots moist with 2-3 cups of water per week. Once planted, add mulch to suppress weeds and maintain moisture.

Email us a photo of your tree planting:

Nebraska's
Natural Resources
Districts

Protecting Lives • Protecting Property • Protecting the Future

Nebraska's Natural Resources Districts work with landowners to plant trees for windbreaks, erosion control, wildlife habitat and other conservation. To find out how the Conservation Tree Program can benefit you, contact your local NRD or visit:
